

The ATLAS System provides more than accurate location

Actall Corporation

ISO 9001:2015 Certified

ATLAS

Real Time Location | Staff Safety | Event Notification Systems

Choose the right Real Time Location System for your facility

ATLAS thrives in any facility, where other systems fall short

Experience

Actall is an established leader in the RTLS industry and has been developing, manufacturing and installing RTLS systems since 1997. Our product lines are installed in hundreds of facilities across the US and abroad. We develop our ATLAS technology and software, eliminating the liability of using third party applications and allowing us to expand the application of our RTLS solutions.

Technology

The Atlas product-line was developed with years of research, innovative technology and by listening to the facility-specific needs of our end-users. ATLAS is engineered using zonal location philosophy to ensure reliable and accurate location information, both indoors and outdoors. When you choose Atlas for your facility, you are choosing a proven RTLS solution unparalleled to other Real Time Location systems available on the market.

Maximize your return on investment

Accurate Location
